About VBrick Systems

Founded in 1997, VBrick Systems, an ISO 9001 certified vendor, is a privately held company that has enjoyed rapid growth by helping our customers successfully introduce mission critical video applications across their enterprise networks. Since our founding, VBrick has been setting the standard for quality, performance and innovation in the delivery of live and stored video over IP networks—LANs, WANs and the Internet. With over 20,000 video appliances installed across over 1,000 IP networks world-wide, VBrick is the recognized leader in reliable, high-performance, easy-to-use networked video solutions.

VBrick is an active participant in the development of industry protocols and continues to play an influential role in the Internet Streaming Media Alliance (ISMA), the MPEG Industry Forum, and Internet2. In 1998 VBrick invented and shipped the world's first MPEG Video Network Appliance designed to provide affordable DVD-quality video across the network. Since then, VBrick's video solutions have grown to include Video on Demand, Management, Security and Access Control, Scheduling, and Rich Media Integration. VBrick solutions are successfully supporting a broad variety of applications including distance learning and training, conferencing and remote office communications, security, process monitoring, traffic monitoring, business and news feeds to the desktop, webcasting, corporate communications, collaboration, command and control, and telemedicine. VBrick serves customers in education, government, healthcare, and financial services markets among others.

VOD WM v3.2 Release Notes

This document contains Release Notes for v3.2 of the VBrick EtherneTV-VOD WM server. Any information contained in this document is VBrick Systems customer confidential and should not be reproduced or distributed to non-VBrick customers. This document has the following information:

[What's New](#)

[Compatibility](#)

[Features](#)

[Installation](#)

[Upgrade](#)

[VBrick Security Update Policy](#)

[Caveats](#)

What's New

The VOD WM server is the most recent addition to VBrick's EtherneTV family of products. The VOD WM is a robust, on-demand server that delivers unicast streams at 125 Mbps. This is a qualified throughput measurement. Actual throughput depends on bitrate, number of connections, disk fragmentation, and other factors and may be higher than the published benchmark.

Compatibility

This VOD WM Server v3.2 release is compatible with:

- VB6000 WM Network Video Appliances with VBDNA 1.0 or higher.
- EtherneTV Portal Server v3.2 or higher.
- StreamPlayer 4.3 or higher.

Note Windows Media Services 9 Series is available as an optional, installable component of Windows Server 2003 Standard Edition and Windows Server 2003 Enterprise Edition. *Windows Media Services is not included with the Microsoft Windows Server 2003 operating system, Web Edition or the Itanium-based versions of the Microsoft Windows Server 2003 operating systems.*

Features

The WM server is part of VBrick's EtherneTV family of products which includes the ETV Portal Server, the WM Network Video Appliance, the Scheduler, and the Network Video

Recorder (NVR). The VOD WM is built on a Dell hardware platform and delivers stored Windows Media assets as unicast streams across an Ethernet network. The VOD WM Server support Windows Media assets and is seamlessly integrated with VBrick's ETV Portal Server. The VOD WM Server supports FF and Rewind. *It does not support Seek and the Seek slider is feature is not shown on the embedded player in ETV Portal Server for WM files.*

Installation

The VOD WM server is shipped from VBrick with Windows 2003 Server Standard Edition and all VOD WM software already installed. If you need to re-install the software for any reason, contact VBrick Support Services.

Changing the Default FTP Password

VBrick strongly recommends you change the default FTP password after the VOD WM server is installed. The default user name/password is anonymous/anonymous. *You must change the password in three different places as explained below: Computer Management, Internet Information Services (IIS), and in ETV Portal Server.*

- ▼ To change the password in **Computer Management**:
 1. Get a new password from your system administrator.
 2. Go to **Start > Control Panel > Administrative Tools > Computer Management**.
 3. Highlight **Local Users and Groups** and double-click on **Users** in the right pane.
 4. Right-click on [anonymous](#) and select **Set Password**. Click **OK** when done.

- ▼ To change the password in **IIS**:
 1. Go to **Start > Control Panel > Administrative Tools > Internet Information Services (IIS) Manager**.
 2. Expand the tree control, right-click on **Default FTP Site** and select **Properties**.
 3. On the **Security Accounts** tab, select the [anonymous](#) user and enter the new password.
- ▼ To change the password in **ETV Portal Server**:
 1. Launch the ETV Portal Server configuration tool. (For more information see the *ETV Portal Server Admin Guide*.)
 2. Navigate to **Global Settings > Servers**.
 3. Change the **FTP Password** so that it matches the password you entered in Computer Management and IIS.

Upgrade

There are no upgrades to VOD WM Server v3.2 This is the first release of the product.

VBrick Security Update Policy

VBrick has fully tested all of its server-based products on Windows Server 2003 Standard Edition with all current Microsoft security updates installed. It is standard VBrick policy to configure and ship our servers with all current service packs and security updates as of the shipping date of the product. We also run limited regression tests when new service packs and updates are released by Microsoft. Once VBrick software is installed at a customer site however, it becomes the customer's sole responsibility to install security updates and software patches as they become available. To protect against imminent threats, VBrick recommends you install and/or test all Microsoft security updates as soon as they are available.

- ▼ To see what security (and other) updates are installed:
 1. Go to **Start > All Programs > Windows Update**.
 2. In the right navigation pane, click **Review your update history** to display the history of all installed updates.
 3. If necessary, go to **Start > Control Panel > Add or Remove Programs** to remove an unwanted update.

Caveats

- Viewers must have Microsoft Windows Media Player installed.
